A NEW WATER SUPPLY

Camp Hope had a very interesting summer this year. The Fourth of July weekend brought the discovery that one of the camp wells had dried up leaving a water supply of 5 gpm with three weeks of camp left. The local health department determined we would need to have a public water system well drilled which added significantly to the cost of obtaining a new well. As the word was spread for the need of a new well prayers ascended to the throne for wisdom, the financial ability to have the new well drilled and a good supply of water. We were specifically asking the Lord for a well which would produce 20-25 gpm. Praise to the Lord who does exceedingly abundantly above all that we ask or think... (Ephesians 3:20). The new well produces 43 gpm and funds were provided to pay for the well as the bills came in. We were also able to add a water storage capacity of 5000 gallons to the camp's water system which will give us a much larger buffer in case something goes wrong with the well. The well was approved for use August 25. It took almost two months of paperwork and actual installation time to get the well on time. Thank you everyone for your prayers and support as the camp went through this large bump in the camp season.

The Lodge is Coming 2012

In the will of the Lord, Camp Hope is planning on starting construction on the lodge located next to the gym in the first quarter of 2012. There will be a total of 18 rooms on two floors which will face the lake. Each room will have its own entrance onto the walkway along with a private bath. The desire of the camp is to use these new rooms for staff housing during the summer season along with weekend events and rental groups. Please pray with us as we finish putting the final touches on the blueprints and find the appropriate contractors.
